

**When bacteria alone aren't keeping the organic build-up in your drain system under control, turn to...**

**H446SF**

# **SUPER-RX**

## **Bacteria and Enzyme Implant for Dialysis Drains**

Packaged for use with the **SureFlo Dosing Systems**, it provides regularly scheduled feeding of your dialysis drain system.

- Enzymes act as a catalyst to break down and pre-digest human proteins, long-chain fatty acids, spent dialysate and organic accumulation.
- Multiple strains of Facultative Bacillus bacteria continue the organic digestion.
- Regular dosing keeps system clean of build-up.

### **The SureFlo Dosing System Offers:**

- Flexible Installation (Wall Mount or Free-Standing)
- Small Footprint
- Fits Under Sink or in Cabinet
- AC or Battery Operation Available
- Limited Product Contact

Each product container has a self-venting insert that locks into place in the dosing system, creating a closed-loop system. No spillage, no leaks.

For fast, continuous results **SUPER-RX** is the product of choice.
