

This quart of product is meant to be used as a one-time activation dose in the drain when initially setting up a Kompressor® Dosing System drain treatment program.

**DIRECTIONS FOR USE:**

Slowly pour entire quart of product into the drain that will later be treated through the A348 Kompressor® Dosing System.

This will act as a catalyst to quickly start reducing drain sludge formed by organic matter in the drains. Further treatment with product packaged specifically for use in the Kompressor® Dosing System will continue to keep the drains running freely.
